READY TEDDY GO!

Erasmus+ KA2 Project

TEDDY AVATAR APPLICATION

During the implementation of the RTG project, a pioneering application featuring a charming Teddy Avatar was created. This innovative educational tool has been meticulously crafted to cater for the needs of autistic children, providing a stimulating and engaging learning experience.

The Teddy Avatar within the application possesses unique capabilities, including counting numbers, showcasing various body and facial parts, and even demonstrating simple daily tasks such as making the bed or reaching for a book. These functionalities serve as vital aids for educators, facilitating the teaching process for autistic children.

Accessible through the link <http://teddy.roboterapia.eu/>, the application is readily available, offering a user-friendly interface for teachers and students. Its interactive nature encourages active participation and comprehension, facilitating a conducive learning environment.

The RTG project is on an upward trajectory, with the development team at POLITECHNIKA LODZKA continuously striving to enhance the application further. Sophisticated scenarios are already implemented and in the pipeline, slated for integration into the final version of the application. These enrichments promise to elevate the application's utility, broadening its scope and impact within the realm of autism.

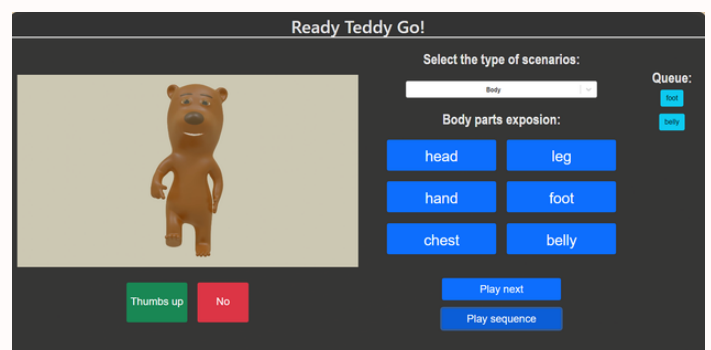

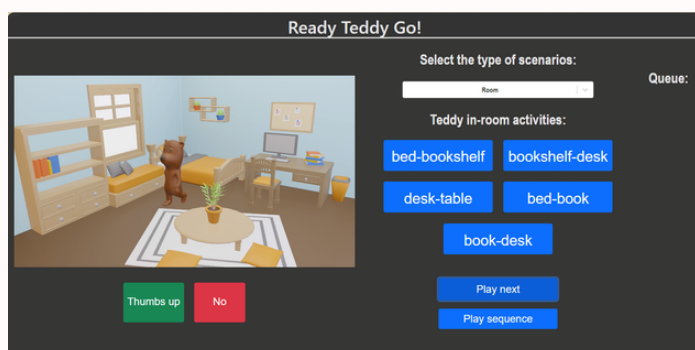

Co-funded by the Erasmus+ Programme of the European Union

Our e-Platform is free

PRE-PILOTING PHASE

Following the successful completion of the first version of the Teddy Avatar Application, each partner organized a pilot meeting. In these sessions, dedicated to presenting our teaching materials and application functionalities to teachers of autistic children, we received an overwhelming surge of enthusiasm and valuable feedback. The teachers appreciated our teaching materials and app, offering insightful suggestions on how to enhance its usability to better suit their needs. Building upon this valuable input, we are now actively engaged in crafting the second version of the application, incorporating more scenarios and functionalities to further enrich the learning experience for both educators and students.

OUR FURTHER STEPS

In our ongoing efforts to enhance the Teddy Avatar Application, we are diligently updating the platform and crafting comprehensive lesson plans tailored for teachers. As we are preparing for the second phase of piloting, we eagerly anticipate putting our new scenarios and lesson plans to the test, collaborating closely with teachers and their students. This crucial phase will not only refine our application, but also ensure its effectiveness in facilitating engaging and impactful learning experiences for autistic children.
